The Boston Book Company's Library Department is devoted exclusively to supplying complete sets of Periodicals and the publications of societies, American, English, and Continental.

As only perfect volumes can make really complete sets, expert page-by-page collation is absolutely necessary to insure perfection. This we give, and our guarantee goes with every set we sell.

Over **One Hundred Thousand** volumes of Periodicals are constantly in stock, the largest collection ever made by a dealer in America or England.

Attention is called to pages 83, 84, where may be found a selected list from the COMPLETE SETS now on hand and for sale by us.

☞ We are always happy to answer any questions which librarians may ask concerning the bibliography of periodicals.

# Bulletin of Bibliography

VOL. 1 JULY, 1898 No. 6

*This Bulletin is published, primarily, as a means of communication between the Boston Book Company and its customers. A constant endeavor will be made, however, to include in each issue enough original matter of sufficient value to induce librarians to preserve and bind up the numbers. Each volume will be provided with a title-page and an index.*

*No subscription price will be put upon the journal, and numbers will not be sold. It will be sent to a selected list of libraries, customers or likely to become customers of the Boston Book Company. The circulation of the Bulletin will be increased in proportion to the interest shown in it, and in the special work of the Library Department of the Boston Book Company. Correspondence is solicited, and should be addressed,*

*The Boston Book Company,*
*15½ Beacon St., Boston, Mass.*

## OUR SPECIAL FIELD.

SURPRISE is often expressed by librarians on learning that The Boston Book Company's Library Department is devoted exclusively to the making up and sale of serials.

When it is understood that by serials is meant not only magazines and reviews, but the vast field of Transactions, Proceedings and Journals of learned and scientific societies, as well as city, state and country reports and documents, and that our work includes not only the American field, but the English and Continental as well, some idea can be had of the scope of our business.

Dealing in such a limited class of literature, we can give special advantages. Intelligent examination of periodicals, and not mere mechanical verification of the paging, is necessary to insure completeness. This we give, while a firm carrying serials as a side line or part of a miscellaneous business has not sufficient time even to check the pages. We are widely known as dealers in this special field, hence are kept informed of sets for sale. Our long experience, available in the form of bibliographic notes, enables us to know when a set is really complete, a fact not always self-evident, but often requiring careful comparison and study.

That librarians may have a larger idea of our work, we exhibit at the Chautauqua Lake Conference of the A. L. A., a volume from many of our American and English *complete* sets, thus showing a collection which, in numbers, at least, we feel sure cannot be duplicated by any other dealer, and by few libraries.

## FAMOUS ENGLISH PRIVATE LIBRARIES.

The twenty days' sale of the collection of printed books formed by the late Earl of Ashburnham is concluded at Messrs. Sotheby, Wilkinson, and Hodge's, the third or final portion realizing £13,911 8s. 6d., which brings the grand total up to £62,712 7s. 6d. for 4,075 lots. The gross total and the uniformly high prices paid throughout prove that the demand for rare books was never so keen as at present, partly because such books become more and more difficult to obtain, and partly because of the great increase in the number of book collectors.

There are four other magnificent collections of printed books, dispersed during the present century, to which, with certain reservations, the Ashburnham Library may be compared. The earliest, that of the Duke of Roxburghe, produced in forty-five days, in 1812, the total of £23,341 for 10,121 lots (for which the Duke is said to have paid not more than £5,000); the Heber sale, 1834-36, with its 52,000 lots, which realized £57,000; the Sunderland Library, 1881–83, with its 13,858 lots, produced in fifty-one days £56,581; whilst in 1882–83, the Beckford collection, in forty-eight days, showed the record total of £73,551. Apart from the fact that the Beckford Library was more than double the size of that of Lord Ashburnham, the condition of the fine bindings in the former was for the most part exceptionally good; in the Ashburnham, the condition was exceedingly indifferent. Taking all circumstances into consideration, the sale which concluded on Saturday is the most remarkable of its kind in the annals of bookselling by auction in this country. It was one of the last of the really great private libraries. There yet remain the splendid collections of Mr. Huth, at Kensington, and of the late Mr. Christie-Miller, at Britwell Court; but, apart from these, the private libraries of this country are now small in size and special in character. *The Clique.*
